

0) Set $S=100$; $r=1\%$; $\text{vol}=20\%$, $T=1$, $K=100$

$S=$	100	Price of the Underlying
$r=$	1%	Risk free interest rate
$\sigma=$	20%	Volatility
$T=$	1	12 Time until maturity (years)
$K=$	100	Strike Price

1) Write a VBA script that prices a Call with a binomial model where n (number of steps) is an input parameter

2) Compare with the B&S formula

price (C): 8,433319

n , steps: Binomial B_S price:
price:

1	10,41472	8,4333187
3	9,102713	8,4333187
7	8,717473	8,4333187
15	8,565028	8,4333187
31	8,496815	8,4333187
63	8,464504	8,4333187
